AUDITORS

12

ASI ACCREDITED AUDITING FIRMS

Operating in **84** COUNTRIES

121

Individual auditors trained via the ASI educationAI program since 2017

ASI GOVERNANCE

ASI is a non-profit, membership-based organisation and registered charity with values of engagement, participation and consensus building. The ASI Certification Program launched in December 2017.

ASI is governed by a Board of 8 Directors, comprised of 6 elected representatives from Production and Transformation, Industrial Users and Civil Society members, plus 2 Independent Directors.

The ASI Standards Committee is focused on the standards, assurance and impacts programs, and is comprised of 24 member and stakeholder representatives, half from industry and half that bring non-industry perspectives. ASI has also convened the Indigenous Peoples Advisory Forum, which liaises with both the Standards Committee and Board on matters relevant to Indigenous peoples.

Thematic Working Groups offer an opportunity for further engagement for members and stakeholders on ongoing topics related to the ASI Standards and their implementation, such as biodiversity and ecosystem services, human rights, greenhouse gas emissions, material stewardship and recycling, and benchmarking and harmonisation.

ABOUT ASI

The Aluminium Stewardship Initiative (ASI) is a global standards-setting and certification organisation. It brings together producers, users and stakeholders in the aluminium value chain to collaboratively foster responsible production, sourcing and stewardship of aluminium.

Members' support and engagement provide the foundation and impulse for ASI's mission-driven program. We invite organisations from all parts of the aluminium value chain – companies, civil society groups, associations and other supporting organisations – to join our efforts.

VISION

To maximise the contribution of aluminium to a sustainable society.

MISSION

To recognise and collaboratively foster responsible production, sourcing and stewardship of aluminium.
